AKSHAJ V NAIR

FULL STACK DEVELOPER | AI-NATIVE ENGINEERING | LLM INTEGRATION

akx_vishnu@pm.me • github.com/akx-vishnu • linkedin.com/in/akx-vishnu • akshajvnair.vercel.app/minimalist •
Remote (IST | EST Overlap Available)

PROFESSIONAL SUMMARY

AI-native Full Stack Developer with production experience building real-time systems, microservices architectures, and LLM-integrated applications using React, Next.js, NestJS, FastAPI, and Groq/Llama-3. Presented original AI research at an international academic conference. Seeking remote US-market roles where fast iteration, modern tooling, and business-aware engineering matter.

TECHNICAL SKILLS

Languages JavaScript (ES2022+), TypeScript, Python, SQL, Kotlin, Dart

Frontend React.js, Next.js 14, Vite, Tailwind CSS, Framer Motion, Radix UI, Socket.IO (client)

Backend NestJS, FastAPI, Flask, Express.js, Node.js, REST APIs, WebSockets

Data & AI PostgreSQL, MySQL, Redis, Supabase, Drizzle ORM, Groq/Llama-3, Watson NLP, Tesseract OCR, Prompt Engineering

Mobile Flutter, React Native, Android (Kotlin)

DevOps & Tools Docker, Git, GitHub Actions, Vercel, Render, Linux, Leaflet.js, Three.js

PROJECTS

EcoScan AI – AI-Powered Food Label Analyzer

React · Flask · FastAPI · PostgreSQL · Groq/Llama-3

- Engineered a full-stack AI web application using a decoupled microservices architecture (Flask + FastAPI) with a dedicated OCR service (Tesseract, OpenCV) and Groq Llama-3 for real-time ingredient analysis, health scoring, and an AI chatbot interface.
- Implemented secure authentication (bcrypt + Flask-Login), scan history, dietary preferences, and allergy data persistence via SQLAlchemy ORM on PostgreSQL; presented at MESKCON International Conference 2026.

RTS Fleet Manager – Real-Time Transport Management Platform

Next.js · NestJS · PostgreSQL · Socket.IO · Redis

- Built a production-grade employee transport platform supporting 50–60 concurrent drivers with sub-second live vehicle tracking via Socket.IO WebSockets, Redis caching, Leaflet maps, and Three.js visualizations.
- Architected a modular NestJS backend with 13 feature modules (Auth, Fleet, Routes, Rosters, Trips, Analytics, Audit); selected Drizzle ORM over TypeORM/Prisma for lower query overhead and reduced memory footprint.

AbsoluteMinds – Library Management System

Python · Tkinter · MySQL

- Desktop application with full CRUD for book inventory, user authentication, issue/return tracking, and CSV bulk operations; auto-database setup with a normalized 3-table MySQL schema.

WORK EXPERIENCE

Python Programming Intern

Apr 2025 – May 2025

KELTRON (Kerala State Electronics Development Corporation) – Knowledge Services Group, Palakkad, India

- Completed intensive program covering Python, data structures, algorithms, and GUI development with Tkinter in a professional engineering environment.

Cybersecurity Intern

Sep 2024 – Oct 2024

Corizo (Remote)

- Completed a structured cybersecurity training program covering network security, threat analysis, and core security principles.

EDUCATION

B.Sc. Computer Science – Expected CGPA: 7.5+ | Sem V SGPA: 8.0

Expected May 2026

Yuvakshetra Institute of Management Studies (NAAC A), University of Calicut, India

RESEARCH & PUBLICATIONS

Paper Presenter – MESKCON International Conference 2026

Jan 2026

MES Kalladi College (NAAC A++), Kerala | Organized under Kerala State Higher Education Council

- Presented: "EcoScan AI – Personalized, AI-based, Eco-friendly Food Product Scanning System" to an international academic audience.

CERTIFICATIONS

IBM / Google (Coursera): Python for Data Science & AI · Generative AI & LLMs · Prompt Engineering Basics · Introduction to AI · AI Application Development (Watson NLP)

IIT Bombay (Spoken Tutorial): Python · JavaScript · PHP & MySQL (75%) · PERL (86.67%) · Java · Git · Android & Kotlin · Bootstrap · R

Other: Prompt Engineering – TaLim AI · Cybersecurity Training & Internship – Corizo
